

## REMOTE CONTROLLED THERMOSTATIC MIXING VALVE WITH ANTI- LEGIIONNAIRE FUNCTION

### MAS 6..7/T/AL

#### APPLICATION

- The essential and indispensable feature of the mixer is its response speed to temperature variations. The mixer compares the water temperature, measured by the probe, with the value set using the knob on the cab.
- The /AL versions also perform the important function that aims to neutralise the legionella bacteria
- For commissioning the device, use the MASInterface sw available by clicking on Data Sheet
